### **Key Features:**

Good game, i have a lot of fun playing this game.

It still needs some patch to become great game.. Just bought Insane, Stunt Mania, and finally this game for some racing game nostalgia. Now this game is very different from the others since it's a water racer. There are ten good looking exotic venues showing off a variety of styles. The waves keep the game fresh and fun as I have to adjust speed and direction all the time to master them.

I like the huge amount of tracks and unlockable watercraft of different capabilities, some suited for top speed and some for sharp turns and freestyle competition. This game clearly rivals any ordinary car racer. If you're looking for a hard core racing ride on water, this fantastic game is for you.

#### THE GREAT

- + Great offering of serious racing
- + Massive number of races
- + Massive number of watercraft
- + Outstanding water simulation
- + Polished and refined gameplay
- + Amazing soundtrack
- + Online and party games to play with friends

#### THE LESS GREAT

- Sometimes too aggressive competitors
- No online leaderboards

. For old-school TRON fans, nothing quite like hopping into a glowy tank, and getting to shoot at other glowy tanks. This game is simple, but fun, and very pretty in a sort of retro way. Love it!. Cheesy cut scenes and voice acting followed by well constructed levels. I can take it or leave it.. Bought the game as a joke (in sale)! Turns out it's one of the best VR games out there for the fun and amount of content.

The game have like 7 endings, plus a lot of free missions you can do. I can't stop laughing at the dialogue options the game lets you pick. You can tell they had fun writing the dialogue.

There are characters that you actually enjoy. The only con is the amount of "noises" (whatever those are) when you "defeat" the girls.

Customisation: you can unlock some clothes and accessories for the main and side characters; the more points you grind the more stuff you can put in your room (pillows, posters, etc); and you have a lot of clothes to buy (but that is expensive af).

Is it worth it at full price? If you are a extradimensional level weeb, yes. Otherwise, wait for sale since the VR DLC will still be full price.. Played Spermination in Science while we were learning about DNA and that crap. Showed the teacher and she approved. Rate 10/10. Will probably get an E for science because of this game.

Game so good I forgot about my cat and he peed all over my flannel. Didn't notice it and took it to school the next day.. Fun Scary puzzle game which is done well with each or those elements. Voice acting is decent but the art is amazing in this game. Seems to be a bunch of escape rooms strung together so far but it is still terrifying than most other games, if you like spooks and puzzles you will like this game

Here is a video of me doing the first room if you want to see how it plays and you can judge if you want to get it yourself <https://youtu.be/vrauLbsARcME>. [Magnibox is a great puzzle game!](#)

[The puzzles are tough, but fare. You are taught everything you need to know solve the puzzle but Joseph Gribbin doesn't hold your hand throughout all the puzzles. I've made it through the first world \(and was greeted with fireworks on a cute world complete screen\), and have nearly completed the second. I can't wait to see what's in store in the remaining 6 worlds!](#)

[The atmosphere created by the art style and music is also a plus. It is very cute and nice \u2013 a great positive input to plug into when you want a break the not so cute and not so nice things in your life.. Don't play this anymore but it was interesting and like 2 bucks at the time.. Spent 60 minutes so far playing. The game is really fun and simple to understand Roguelike game. I highly recommend to my friends. Cute graphics, no bugs found yet and straight-foward gameplay, and a great price make this a must have for any fans of Roguelikes.. this game is cheese/10. \*Crime Secrets: Crimson Lily\* is a collaboration between One More Level and Artifex Mundi. Many of the mechanics, sound effects, and puzzles are borrowed from the 9 Clues series, and I'm sorry to say it's in a way that just isn't as well done.](#)

[The game has an unfinished quality at times due to places where the vocals and text don't match up, don't make sense, and/or have timing issues. Even worse there are places where the text for items doesn't match the actual item, such as a bowl that is actually a bow, a pen that is actually a pencil, and a glasses case that is actually just the glasses. The story also lacks cohesion and is sloppy in a way that's often confusing. These flaws end up making the places where the gameplay has the typical hidden object puzzle adventure game idiosyncrasies more apparent and annoying. For example, fire extinguishers are useless if you can't get to them. A crowbar would totally be the best tool to open a stuck can of paint. Music and sound effects that don't fit – for example, using sounds that are clearly dogs for wolves – round off the unfinished feel.](#)

[I still am giving this game a recommend for those who are devoted Artifex Mundi fans like myself. For those new to the genre, there are many better titles to choose from.](#)
