About This Content

The Great Western Main Line from Oxford to Paddington is a bustling thoroughfare, taking passengers and freight from the west of England into London, and you can drive your own high speed services and freight trains along this busy route in Train Simulator.

The line originally opened way back in the 1830s as part of Brunel's fantastic Great Western Railway, which was designed to have as few challenging gradients as possible to benefit running speed. Today, the line is one of Britain's busiest, carrying thousands of commuters every day and handling large amounts of freight. The Oxford-Paddington line in Train Simulator runs from London Paddington to Oxford Station via Reading and includes a variety of modern passenger and freight trains to drive, as well as some challenging scenarios to put your driving skills to the test.

Scenarios:

8 scenarios:

- Autumn Leaves
- Chasing Yellows
- Lost in the Shuffle

-
- Oxford to Reading Local
 - Return Ticket

This is the best route EVER! It gives you so much high detailed track with incredibly good trains and highly detailed stations. If you like freight, high speed or slow trains this is the add on for you. And all this for £35.99 and if there is a sale then for just £32.39. The only thing that i dont like about it is that the class 166 has a weak brake and slow start and that the route doesnt have enough electric tracks so i cant use my high speed trains on it. Otherwise I give it 10/10. Amazing route. this route is good for the class 67 Diamond Jubilee scenario: Diamond in the rough.. High speed rail at its finest.. This route is a fantastic route.

It's incredibly detailed and very worth the £39.99 if you can get it on the sale then great!

It's a fantastic route with beautiful locos, realistic sounds beautiful scenery one of the best routes Dovetail Games has actually ever made so all in all if you are starting your collection or expanding it then this route is a perfect buy!

I would certainly recommend it especially for the £32.99 price on the sale at the moment!

Love it i would give it 5* out of 5

p.s this route is not that graphically demanding so it won't put your pc under too much strain which is a relief unlike some of the newer routes.). Amazing route. this route is good for the class 67 Diamond Jubilee scenario: Diamond in the rough.

Routes are ok but in some places incomplete - signaling. Please,, if U making route finishe it ! And don't forget screw up with timing - clearly it is impossible to keep to the schedule.

At first it was thumb up but after playing it for a little while it is going to be down, sorry.. 10V10, its showing its age but for the price as Furry said for the price of a drink and a butty.. Wow this is some good quality DLC and for a very good price (u00a35.99). Cant fault it and I wish all the DLC was like this. For the price of a sandwich and a drink you can get hours of entertainment from the route and its locos. Simliar DLC can set you back 30 quid.. Dated but fun to drive. I only got it as it was dirt cheap at a sale.. Solid product, and great deal at today's prices. Plenty of detail and character, if lacking in traffic in QD (but to be expected at this age). Recommendend wholeheartedly.. love the route to drive on wasting what the particular train burns.. The description does not warn you that you need specific train DLC to access most of these scenarios. I can only play 2 out of 8 promised in the description, having bought the basic Train Simulator 2015 package.. This route is extremely cheap and it is really enjoyable to play. It has many trains and some good scenarios. I would like to see a bit more detail on some of the stations like Oxford however. I would definitely reccommend this route to anyone thinking about buying!
